To restrict your directory information, login into your UAccess Student Center and scroll down to the “Personal Information” section.

From the drop-down menu choose “Privacy Settings” and click on the arrow button.
Click on the “EDIT FERPA/DIRECTORY RESTRICTIONS” to make adjustments.
You can restrict specific fields, such as addresses, email, names, date of birth and phones. Or, you can restrict all fields.

Restricting ALL fields or the NAME field will result in no information being given out on the student, nor will verification of enrollment be given to anyone about the student's attendance at UA.
